Gameplay Settings **Jedi Fallen Order** for PC

Gameplay

Difficulty

Select to choose the difficulty of the game. This option includes Story Mode, Jedi Knight, Jedi Master, and Jedi Grand Master. Story Mode will allow the player to focus more on the story and include minimal combat. Jedi Knight is the least difficult. Jedi Grand Master is the most difficult.

Auto Switch Target on Enemy Death

Select either Visible Enemies Only or OFF to choose to switch target on enemy death.

Disable Button Mashers and Quick-Time Events

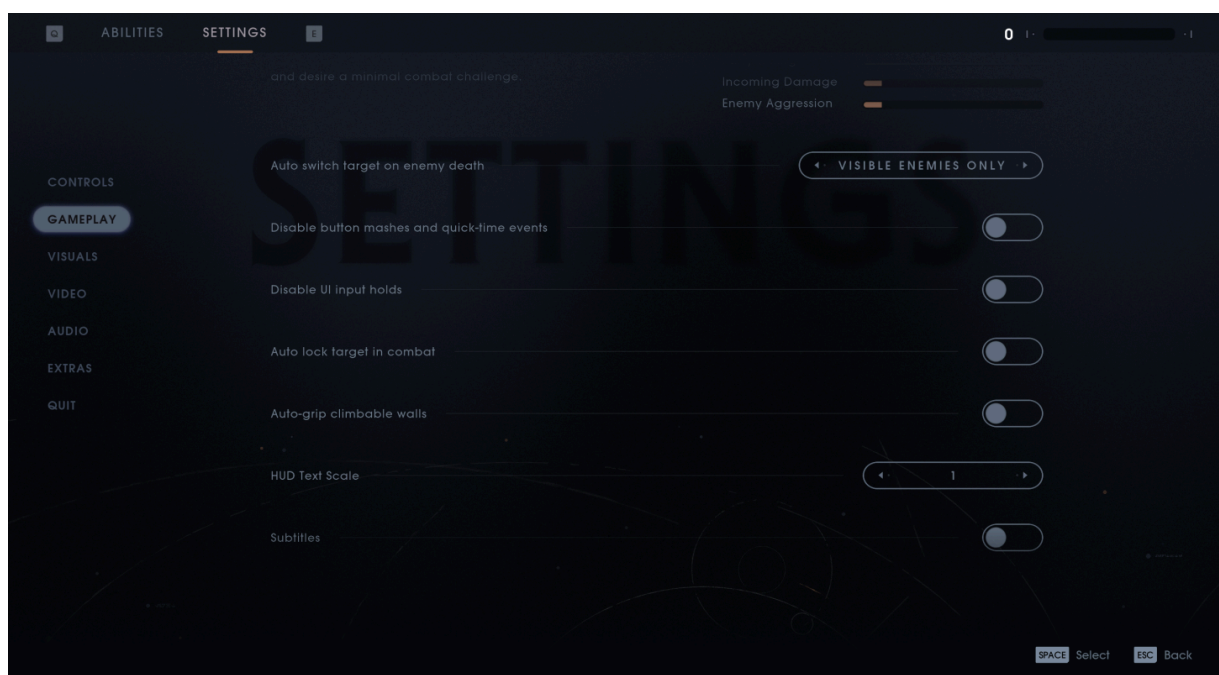

Select to enable or disable button sequences that require button mashing or quick time events.

Disable UI Input Holds

Select to enable or disable hold to press button commands.

Accessibility

Auto-Grip Climbable Walls

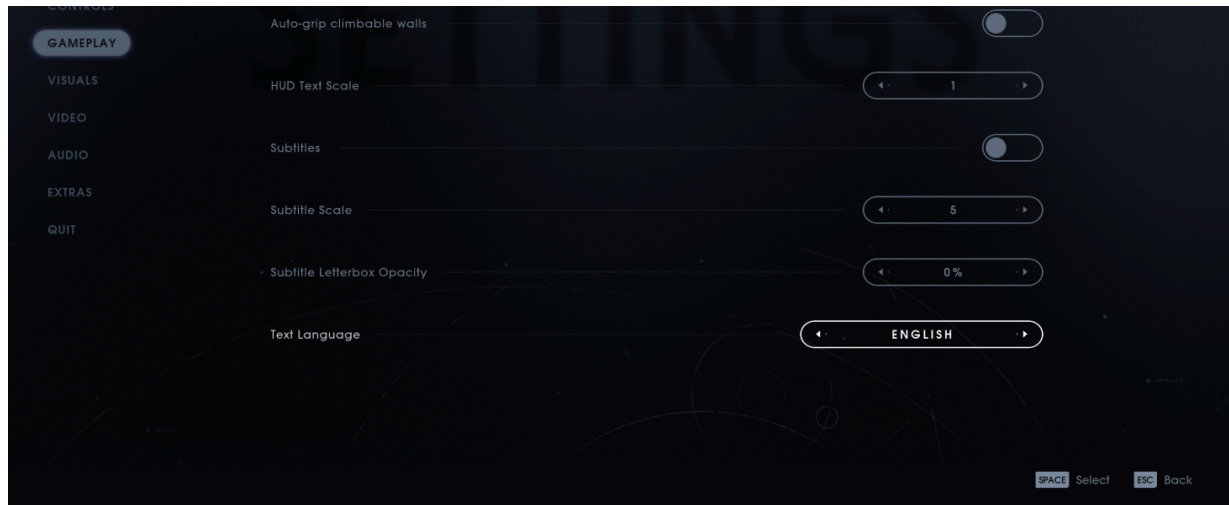

Select to enable or disable character's ability to climb walls automatically

HUD Text Scale

Select the size of HUD text. This has a value range of 1-6. The default is 1.

Subtitles

Switch to include subtitles during gameplay, scenes, etc.

Subtitle Scale

Select to change the size of your subtitle text. This option has a value range of 1 to 15. The default is 10.

Subtitle Letter Box Opacity

Select to change the opacity of the box the subtitles will appear in. This option has a value range of 10% to 100%.

Text Language

Select the language of the text in the game.
